SYSTEM DEVELOPER / PHP DEVELOPER

I am an 8+ years php developer who specializes in creating dynamic websites and web applications. I have a strong understanding of the php language and how to use it to create robust and scalable web solutions. I am also experienced in using various php frameworks and libraries to further extend the functionality of my applications. In addition to php, I am also skilled in using Laravel and Bootstrap Framework, HTML, CSS, JavaScript/JQuery, and MySQL to create complete web solutions.
